Links Ratio

SEO analysis of the ratio of internal links to external links.

There are one or more issues with the number of links on this page:

Too few internal links (4).

internal: 4

external: 0

Add links to external resources that are useful for your readers. Make sure you link to high-quality sites - Google penalizes pages that link to "spammy" sites (ones that break the Google webmaster guidelines).

Ideally, the links should be highly relevant to the subject you're writing about. It's impossible to cover every aspect of a subject on a single page, but your readers may be fascinated by some detail you barely touch on. If you link to a resource where they can learn more, they'll be grateful. What's more, you'll be rewarded with higher rankings!

Minify Javascript

Does the site use minified JavaScript?

Some Javascript files don't seem to be minified.

`https://liemoro.com/assets/index-D_I35vi_.js`

JavaScript files appear in many places, including frameworks (like Bootstrap), themes and templates, and third-party plugins.

So you should track down where the culprit (un-minified) JavaScript files come from. For instance, if the un-minified JavaScript lives inside a third party plugin, you can minify it. But when you update the plugin to a new version, the JavaScript files will need to be compressed again.

There are server-side tools (including WordPress plugins) to automatically minify JavaScript files.

Mobile Speed

How fast does your website respond to mobile users?

The page performance is good across all key metrics.
